Dreaming Frankenstein Liz Lochhead 2011-05-01 'Human relationships, especially as seen from a woman's point of view, are central: attraction, pain, acceptance, loss, triumphs and deceptions, habits and surprises; always made immediate through a storyteller's concrete detail of place or voice or object or colour remembered or imagined' - Edwin Morgan 'Dreaming Frankenstein is a rare thing: a book of poems which sparkles' - The Scotsman '... one of the few poets writing today capable of encompassing the matter of contemporary life in terms that are both attractive and thought-provoking' - Books in Scotland Liz Lochhead has built an impressive reputation as poet, playwright and performer, attracting a large and admiring public. *Dreaming Frankenstein* and *Collected Poems* stands as a monument to her early work. Four collections - *Memo for Spring* (1972), *Islands* (1978) and *Grimm Sisters* (1981) and the title volume together provide a complete record of her poetry from 1967 to 1984. In *Dreaming Frankenstein* human relationships, especially as seen from a woman's point of view, are central. Attraction, pain, acceptance, loss, triumphs and deceptions are all made immediate through her imagery and acute powers of observation and through her flair as a storyteller.

Doing Justice to History Abdul Mohamud 2016-01-28 The History curriculum in schools adopts a grand narrative approach that pushes the history of the non-dominant to the margins and even to obscurity. To secure an authentic approach to Black history, the authors have developed an enquiry-based approach that gives teachers the knowledge and confidence to teach the History curriculum inclusively. The book presents five discrete enquiries. Of three on African-American history, the first deals with the Civil Rights movement, asking why Robert E. Williams has been forgotten. A chapter takes teachers up to Obama s time, and a third, written by Jenice Lewis, describes how the US program, Teaching for Change, has pioneered work that imbues history teaching with justice. The two chapters on British Black history tackle the issue of invisibility, asking why Somali people decided to unpack their bags in Britain; and why Claudia Jones, founder of the first Black journal in England, and founder of the world-famous Notting Hill Carnival has no memorial plaque outside her house in England nor in her homeland. One chapter on African history looks at African Empires and the Transatlantic Slave Trade, and one looks sideways at apartheid in South Africa."

The importance of teaching Great Britain: Department for Education 2010-11-24 England's school system performs below its potential and can improve significantly. This white paper outlines action designed to: tackle the weaknesses in the system; strengthen the status of teachers and teaching; reinforce the standards set by the curriculum and qualifications; give schools back the freedom to determine their own development; make schools more accountable to parents, and help them to learn more quickly and systematically from good practice elsewhere; narrow the gap in attainment between rich and poor. The quality of teachers and teaching is the most important factor in determining how well children do. The Government will continue to raise the quality of new entrants to the profession, reform initial teacher training, develop a network of "teaching schools" to lead training and development, and reduce the bureaucratic burden on schools. Teachers will be given more powers to control bad behaviour. The National Curriculum will be reviewed, specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged. Schools will be given more freedom and autonomy, the Academies programme extended and parents will be able to set up "Free Schools" to meet parent demand. Accountability for pupil performance is critical, and much more information will be available to aid understanding of a school's performance. School improvement will be the responsibility of schools, not central government. Funding of schools needs to be fairer and more transparent, and there will be a Pupil Premium to target resources on the most deprived pupils.

Covid By Numbers David Spiegelhalter 2021-10-07 'I couldn't imagine a better guidebook for making sense of a tragic and momentous time in our lives. Covid by Numbers is comprehensive yet concise, impeccably clear and always humane' Tim Harford How many people have died because of COVID-19? Which countries have been hit hardest by the virus? What are the benefits and harms of different vaccines? How does COVID-19 compare to the Spanish flu? How have the lockdown measures affected the economy, mental health and crime? This year we have been bombarded by statistics - seven day rolling averages, rates of infection, excess deaths. Never have numbers been more central to our national conversation, and never has it been more important that we think about them clearly. In the media and in their Observer column, Professor Sir David Spiegelhalter and RSS Statistical Ambassador Anthony Masters have interpreted these statistics, offering a vital public service by giving us the tools we need to make sense of the virus for ourselves and holding the government to account. In Covid by Numbers, they crunch the data on a year like no other, exposing the leading misconceptions about the virus and the vaccine, and answering our essential questions. This timely, concise and approachable book offers a rare depth of insight into one of the greatest upheavals in history, and a trustworthy guide to these most uncertain of times.

Boy in the Tower Polly Ho-Yen 2014 When they first arrived, they came quietly and stealthily as if they tip-toed into the world when we were all looking the other way. Ade loves living at the top of a tower block. From his window, he feels like he can see the whole world stretching out beneath him. His mum doesn't really like

looking outside" but it's going outside that she hates. She's happier sleeping all day inside their tower, where it's safe. But one day, other tower blocks on the estate start falling down around them and strange, menacing plants begin to appear. Now their tower isn't safe anymore. Ade and his mum are trapped and there's no way out . . .

Advanced Problems in Mathematics Stephen Siklos 2020-10-09 This new and expanded edition is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge Colleges for conditional offers in mathematics. They are also used by some other UK universities and many mathematics departments recommend

that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics bridges the gap between school and university mathematics, and prepares students for an undergraduate mathematics course. The questions analysed in this book are all based on past STEP questions and each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anyone interested in advanced mathematics. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Creating the Curriculum Dominic Wyse 2012-08-21 Is there an 'ideal' primary school curriculum? Who should decide what the curriculum is? Should teachers have autonomy over how they teach? The curriculum is the heart of what teachers teach and learners learn: effective teaching is only possible with an effective curriculum. Yet in spite of its importance, there has been a crisis in curriculum that has been caused in large part by governments assuming direct control over the curriculum, assessment, and increasingly, pedagogy. *Creating the Curriculum* tackles this thorny issue head on, challenging student and practising primary school teachers to think critically about past and present issues and to engage with a new wave of curriculum thinking and development. Considering curriculum construction and its impact on teaching and learning in the four countries of the UK, key issues considered include: who should decide the curriculum, its aims and its values the extent to which issues in primary education swing back and forth Subjects versus thematic organisation, stages and phases, progression, breadth and balance prescription versus teacher autonomy the key features of effective classroom practice strategies for assessing the whole curriculum how language in the classroom influences curriculum design understanding curricula in the context of children's social and personal circumstances creativity, curriculum and the classroom. Illustrated throughout with strategies and case studies from the classroom, *Creating the Curriculum* accessibly links the latest research and evidence with concrete examples of good practice. It is a timely exploration of what makes an effective and meaningful curriculum and how teachers can bring new relevance, motivation and powerful values to what they teach.

The Mindful English Teacher Francis Gilbert 2017-08-10 WHAT OTHER PEOPLE ARE SAYING ABOUT THE MINDFUL ENGLISH TEACHER "I found the book really helpful, as a person who has struggled with anxious thoughts in the past, I've found it has helped me process those in a mindful way that has left me with more confidence. I like how the book is very accepting of different teaching styles and differentiates between by using different teaching voices in the book. I found the book accessible and the writing was easy to read. It was an engaging read as well as an educational one." An English teacher. "This book is basically a 'go to' book for student teachers. It is easy to read and detailed, which alongside Francis Gilbert's study guides really sets student teachers on the road to success. Thanks Francis!" Chloe Charles, PGCE English teacher. "I think mindfulness, planning, reciprocal reading, all discussed at length in the book, have been effective tools in developing my pedagogy and are methods I will definitely use in my teaching. I think the book is an excellent introduction to teaching English and makes the theory and learning easy and accessible." An English teacher. "A useful guide for both new and experienced teachers who want to excel." An English teacher. "A great read with so many useful tips and tasks. It made me step back and reflect easily on my practice." An English teacher. "This book looks at English teaching in a refreshing and non-intimidating manner. It is inclusive for all training and qualified teachers with a clear structure that encourages passionate and creative teaching in modern schools." Sarah Stevens, PGCE English teacher. In need of some inspiration? Are you feeling you're losing your mojo? This is the ultimate guide for English teachers in the 21st century because it not only offers advice about the content, skills and strategies necessary to become an effective English teacher but also provides invaluable help in dealing with the

stresses and strains of the job. The well-being of students and teachers are seen as integral to outstanding teaching and learning. The Mindful English Teacher is jam-packed with creative ways to be happy and productive on the job: it is full of useful meditations, creative visualisations and activities which not only make being an English teacher fun but also with its moments of relaxation. It is undergirded with a firm grounding in theory and evidence-based practice, which is explored in the form of lively scripts, real-life conundrums & audits. The scripts can be read by groups of teachers, making the book ideal to use for school-based CPD or Initial Teacher Education. This unique guide aims to inject a genuine sense of joy into one of the most challenging jobs in teaching, using techniques that have been proven to work in a wide range of educational settings.

Celsius 7/7 Michael Gove 2014-08-21 Celsius 7/7 analyses how the West's approach to fundamentalism is destined to lead to further atrocities. In his column which appeared in The Times on the morning of 9/11, Michael Gove prophetically argued that the West's policy of appeasement towards terror was destined to provoke yet greater atrocities. In CELSIUS 7/7, Gove explores the roots of Islamic rage, the historical factors which culminated in the current terrorist campaign and the Muslim world's troubled accommodation with modernity. He also analyses the intellectual roots and political appeal of Islamism, explains the factors behind Jihadi violence and places the current fundamentalist challenge in context. Combining a broad historical sweep with character sketches of key figures such as Michel Aflaq, Charles de Gaulle, Sayyid Qutb, Donald Rumsfeld, Abu Musab al-Zarqawi, Henry Kissinger and Osama bin Laden, as well as a detailed survey of Western political failures, Gove's account is a shrewd and detached analysis that provides powerfully convincing recommendations for future action.

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee 2013-06-11 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.
