Securing Outer Space Natalie Bormann 2009-01-30 The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected – but not challenged – the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to 'bring back space' into the realm of International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. Securing Outer Space will be of great interest to students of space power, critical security studies and IR theory.

Profiting with Iron Condor Options Michael Benklifa 2011-01-19 In a straightforward approach, Hanania Benklifa provides readers the practical knowledge needed to trade options conservatively in Profiting with Iron Condor Options: Strategies from the Frontline for Trading in Up or Down Markets. The objectives are simple: make 2%-4% a month staying in the market as little as possible. Market experts use option condors to consistently earn monthly returns while trading conservatively and staying in the market as little as possible. Benklifa--who manages \$10+ million in condor trades each month--shows you exactly how to run these trades and earn these returns, delivering all the details you need to master every nuance of this remarkable strategy. Benklifa shares option condors examples using market realities, not oversimplified abstractions. You'll learn how to handle real-life market dynamics that can dramatically impact results, including rising and falling volatility, changing bid-ask spreads, and distorted call parity. You'll learn how to profit in the sideways markets where condor options are most widely used--and also in extreme-trending markets that offer their own surprising opportunities. Traders who focus on a specific type of trade have a history of outperforming stock pickers and directional investors. This book will give you that deep and usable level of knowledge about one of today's most well-proven strategies: option condors.

Guillaume Faye and the Battle of Europe Michael O'Meara 2013-01 Europe is at war and does not know it. She is overrun by invaders from the Global South, who seek to replace those who have inhabited her lands for at least the last 30,000 years. She is subject to an American overlord, whose world system dictates her de-Europeanization and globalization. She is mismanaged and betrayed by EU technocrats, corrupt politicians, and plutocratic elites. Without a revolutionary mobilization in her defense, the thousand-year-old civilization that grew out of the medieval Respublica Christiana and that we today associate with 'Europe' - along with the unique genetic heritage of her peoples - will forever cease to exist. Guillaume Faye - doctorate from one of France's most prestigious Ecoles, social philosopher, author of numerous books and articles - is the Cassandra warning Europeans of their approaching extinction, and the need to prepare for the impending Battle of Europe. Michael O'Meara, Ph.D., studied social theory at the Ecoles des Hautes Etudes en Sciences Sociales, and modern European history at the University of California. He is the author of New Culture, New Right: Anti-Liberalism in Postmodern Europe (2004)."

This new third edition remains firmly targeted at the undergraduate market, and is comprised of five main sections: Materials Science, Engineering Materials, Forming Processes, Behaviour in Service and Property and Evaluation Tests, resulting in 32 chapters (as compared to 17 in the 2nd edition). The numbers of worked examples have been reduced, due to the publication of John's Work Out: Engineering Materials which is recommended to be used alongside the main text and is comprised mainly of worked examples and problems.

Jung and the Postmodern Christopher Hauke 2013-10-23 What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a response to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and profession alike.
