Concrete P. Kumar Mehta 2014 The most comprehensive and current guide to the properties, behavior, and technology of concrete.- This thoroughly updated edition contains new information on: Recently built construction projects worldwide; Shrinkage-reducing admixtures; Self-consolidating concrete, pervious concrete, internal curing, and other cutting-edge innovations; Modeling of ice formation and alkali-aggregate reaction in concrete; Environmental impact of concrete. - Each chapter begins with a preview of the contents and ends with a self-test and a guide for further reading. More than 300 drawings and photographs illustrate the topics discussed in this definitive text on concrete.

Profiting with Iron Condor Options Michael Benklifa 2011-01-19 In a straightforward approach, Hanania Benklifa provides readers the practical knowledge needed to trade options conservatively in Profiting with Iron Condor Options: Strategies from the Frontline for Trading in Up or Down Markets. The objectives are simple: make 2%-4% a month staying in the market as little as possible. Market experts use option condors to consistently earn monthly returns while trading conservatively and staying in the market as little as possible. Benklifa--who manages \$10+ million in condor trades each month--shows you exactly how to run these trades and earn these returns, delivering all the details you need to master every nuance of this remarkable strategy. Benklifa shares option condors examples using market realities, not oversimplified abstractions. You'll learn how to handle real-life market dynamics that can dramatically impact results, including rising and falling volatility, changing bid-ask spreads, and distorted call parity. You'll learn how to profit in the sideways markets where condor options are most widely used--and also in extreme-trending markets that offer their own surprising opportunities. Traders who focus on a specific type of trade have a history of outperforming stock pickers and directional investors. This book will give you that deep and usable level of knowledge about one of today's most well-proven strategies: option condors.

Analog Circuit Design Bob Dobkin 2011-09-26 Analog circuit and system design today is more essential than ever before. With the growth of digital systems, wireless communications, complex industrial and automotive systems, designers are challenged to develop sophisticated analog solutions. This comprehensive source book of circuit design solutions will aid systems designers with elegant and practical design techniques that focus on common circuit design challenges. The book's in-depth application examples provide insight into circuit design and application solutions that you can apply in today's demanding designs. Covers the fundamentals of linear/analog circuit and system design to guide engineers with their design challenges Based on the Application Notes of Linear Technology, the foremost designer of high performance analog products, readers will gain practical insights into design techniques and practice Broad range of topics, including power management tutorials, switching regulator design, linear regulator design, data conversion, signal conditioning, and high frequency/RF design Contributors include the leading lights in analog design, Robert Dobkin, Jim Williams and Carl Nelson, among others

Brainfilling Curves - A Fractal Bestiary Jeffrey Ventrella 2012-03-01 * A lovingly-crafted visual expedition,

lead by a lifelong fractal wizard with an obsession for categorizing fractal species * Hundreds of beautiful color images * An in-depth taxonomy of Koch-constructed Fractal Curves * An intuitive introduction to Koch construction * A must-read for anyone interested in fractal geometry

A Tale of Two Vampires Katie Macalister 2012-09-04 Time isn't always on a vampire's side.... Iolanthe Tennyson has had a very bad year—due in part to the very bad men in her life. So she's accepted her cousin's invitation to spend the summer in Austria to indulge her photography hobby. Rumors of a haunted forest there draw Iolanthe into the dark woods—and into the eighteenth century.... Nikola Czerny is a cursed man, forced by his half brothers to live forever as a Dark One. But his miserable existence takes an intriguing turn when a strange, babbling woman is thrown in his path. Iolanthe claims to know Nikola's daughter—three hundred years in the future. She also knows what fate—in the form of his murderous half brothers—has in store for him. If only she knew the consequences of changing the past to save one good, impossibly sexy vampire...

Detector Circuits Rudolf F. Graf 1993 The Newnes Circuits Series provides designers with quick reference guides to various types of circuits, and is written by a professional technical writer. Each book comes with 250-300 ready-to-use designs, with schematics and explanations.

Measuring Circuits Rudolf F. Graf 1996-12-15 This series of circuits provides designers with a quick source for measuring circuits. Why waste time paging through huge encyclopedias when you can choose the topic you need and select any of the specialized circuits sorted by application? This book in the series has 250-300 practical, ready-to-use circuit designs, with schematics and brief explanations of circuit operation. The original source for each circuit is listed in an appendix, making it easy to obtain additional information. Ready-to-use circuits Grouped by application for easy look-up Circuit source listings

An Introduction to HPLC for Pharmaceutical Analysis Oona McPolin 2009-03-01 If you are new to HPLC, this book provides an invaluable guide to how HPLC is actually used when analysing pharmaceuticals. It is full of practical advice on the operation of HPLC systems combined with the necessary theoretical knowledge to ensure understanding of the technique. Key features include: A thorough discussion of the stationary phase enabling the reader to make sense of the many parameters used to describe a HPLC column; Practical advice and helpful hints for the preparation and use of mobile phase; A complete overview of each of the different components which together make up a HPLC system; A description of the contents of a typical HPLC analytical method and how to interpret these; A step-by-step guide on how to follow a method and set up a HPLC analysis; A discussion of system suitability criteria and how to interpret the values obtained during an analysis; Explanation of the common methods of calibration and quantification used for pharmaceutical analysis.

Handbook of Reading Interventions Rollanda E. O'Connor 2011-06-17 Comprehensive, authoritative, and designed for practical utility, this handbook presents evidence-based approaches for helping struggling readers and those at risk for literacy difficulties or delays. Leading experts explain how current research on all aspects of literacy translates into innovative classroom practices. Chapters include clear descriptions of effective interventions for word recognition, spelling, fluency, vocabulary, comprehension, and writing, complete with concrete examples and teaching scripts. Coverage also encompasses preschool literacy instruction and interventions for older readers, English language learners, and students with learning disabilities, as well as peer-mediated and tutoring approaches.

CMOS Cookbook DON LANCASTER 1997-02-27 The CMOS Cookbook contains all you need to know to understand and successfully use CMOS (Complementary Metal-Oxide Semiconductor) integrated circuits. Written in a "cookbook" format that requires little math, this practical, user-oriented book covers all the basics for working with digital logic and many of its end applications. Whether you're a newcomer to logic and electronics or a senior design engineer, you'll find CMOS Cookbook and its examples helpful as a self-learning guide, a reference handbook, a project-idea book, or a text for teaching others digital logic at the high school through university levels. In the pages of this revised edition, you'll discover: *What CMOS is, who makes it, and how the basic transistors, inverters, and logic and transmission gates work *CMOS usage rules, power-supply examples, and information on breadboards, state testing, tools, and interfacing *Discussions of the latest CMOS devices and sub-families, including the 74C, 74HC, and 74HCT series that streamline TTL and CMOS interfacing *An in-depth look at multivibrators - including astable, monostable, and bistable - and linear techniques *Clocked-logic designs and the extensive applications of JK and D-type flip-flops *A helpful appendix featuring a TTL-to-CMOS conversion chart

IP Routing Fundamentals Mark A. Sportack 1999 The definitive introduction to routing, demystifying routers by exploring the mechanics, routing protocols, network interfaces, and operating systems. The book teaches how routers can be used in today's networks, as well as how they will be used in the future.

Civil Engineering and Symmetry Edmundas Kazimieras Zavadskas 2019-06-14 A topic of utmost importance in civil engineering is finding optimal solutions throughout the life cycle of buildings and infrastructural objects, including their design, manufacturing, use, and maintenance. Operational research, management science, and optimization methods provide a consistent and applicable groundwork for engineering decision-making. These topics have received the interest of researchers and, after a rigorous peer-review process, eight papers have been published in this Special Issue. The articles in this Printed Edition demonstrate how solutions in civil engineering, which bring economic, social, and environmental benefits, are obtained through a variety of methodologies and tools. Usually, decision-makers need to take into account not just a single criterion, but several different criteria and, therefore, multi-criteria decision-making (MCDM) approaches have been suggested for application in five of the published papers; the rest of the papers apply other research methods. Most approaches suggested decision models under uncertainty, proposing hybrid MCDM methods in combination with fuzzy or rough set theory, as well as D-numbers. The application areas of the proposed MCDM techniques mainly cover production/manufacturing engineering, logistics and transportation, and construction engineering and management. We hope that a summary of the Special Issue as provided here will encourage a detailed analysis of the papers included in the Printed Edition.

Survival, Evasion, Resistance, and Escape Handbook (SERE) United States Navy Marine Corps 2013-11-07 The manual encompasses those basic skills necessary for worldwide survival, facilitating search and rescue efforts, evading capture by hostile forces. It is based on and reinforces the values expressed in the Code of Conduct while maintaining an appropriate balance of sound educational methodology and realistic/stressful training scenarios. Covers the following areas: wilderness living, shelter construction, fire building, map and compass navigation, backpacking, food and water procurement, wilderness medicine and first aid, signaling and rescue techniques, escape and evasion, conduct after capture and techniques.

Land Use Competition Jörg Niewöhner 2016-07-29 This book contributes to broadening the interdisciplinary knowledge basis for the description, analysis and assessment of land use practices. It presents conceptual advances grounded in empirical case studies on four main themes: distal drivers, competing demands on different scales, changing food regimes and land-water competition. Competition over land ownership and use is one of the key contexts in which the effects of global change on social-ecological systems unfold. As such, understanding these

rapidly changing dynamics is one of the most pressing challenges of global change research in the 21st century. This book contributes to a deeper understanding of the manifold interactions between land systems, the economics of resource production, distribution and use, as well as the logics of local livelihoods and cultural contexts. It addresses a broad readership in the geosciences, land and environmental sciences, offering them an essential reference guide to land use competition.

Moment Maker Carlos Enrique Whittaker 2014-04-01 How to Make Every Moment of Every Day Count Every moment of every day, you have a choice to make. You can either let the minutes pass you by or you can claim them for what they are: opportunities to unlock the full depth of life's potential. For Carlos Whittaker, renowned blogger, musician and worship leader, and husband and dad, living deliberately is a way of life. Making moments that are significant, memorable, or impactful are a part of how he navigates each day, and it has forever changed the landscape of his story. In *Moment Maker*, Carlos explains his methodology for living intentionally and claiming moments that touch the lives of others, whether that be his family, his friends, his colleagues, or total strangers. Carlos isn't asking anyone to make a big investment in time, energy, or money. He is simply uncovering the investment of attention. You don't have to buy tickets to special events or orchestrate elaborate surprises. You just have to be aware—of your surroundings, the people you encounter, the things that interest those important to you, the opportunities that present themselves—and be prepared to seize those moments and see lives changed.

Cisco BGP-4 Command and Configuration Handbook William R. Parkhurst 2001 "Cisco BGP-4 Command and Configuration Handbook is a clear, concise, and complete source of documentation for all Cisco IOS Software BGP-4 commands. If you are preparing for the CCIE written and lab exams, this book can be used as a laboratory guide to learn the purpose and proper use of every BGP command. If you are a network designer, this book can be used as a ready reference for any BGP command." "Cisco BGP-4 Command and Configuration Handbook provides example scenarios that demonstrate the proper use of every BGP-4 command, which can be implemented using a minimum number of routers. This will enable you to learn each command without requiring an extensive and expensive lab configuration. The scenarios are presented so that the purpose and use of each command can be demonstrated without clouding the issue. Some of the examples lead you into common non-working situations in order to reinforce the understanding of the operation of the particular BGP command."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. An Anthology of Classic Australian Folklore 2008 Lonely because he is the only mouse in the church, Arthur asks all the town mice to join him. Unfortunately the congregation aren't so welcoming. But all is not lost when a robber tries to steal the church candlesticks, the mice foil his plans and win back their home.

Pain Psychology for Clinicians Leanne R. Cianfrini 2021-02-12 Given the heightened focus on the opioid crisis and its intersection with adequate chronic pain management, there is an impetus to shift patient care toward self-management and comprehensive interdisciplinary modalities. However, despite the evidence base for efficacy, pain psychology remains largely relegated to the complementary and alternative medicine designations and medical providers struggle to search for trained pain psychologists in their community. This unique book makes core

psychological techniques accessible to medical providers and allied health professionals who are on the front lines of routine communication with patients living with chronic pain. Practical suggestions and vignettes demonstrate how to briefly and effectively incorporate key concepts from Cognitive-Behavioral Therapy, Acceptance and Commitment Therapy, Motivational Interviewing and other orientations into any health care setting.

Securing Outer Space Natalie Bormann 2009-01-30 The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected – but not challenged – the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to 'bring back space' into the realm of International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. *Securing Outer Space* will be of great interest to students of space power, critical security studies and IR theory.

Truly Funny Stories Vol. 2 Lisa Scottoline 2015-11-10 The collections from beloved mother-daughter writing duo Lisa Scottoline and Francesca Serritella are among the best reviewed humor books published today and have been compared to the late greats, Erma Bombeck and Nora Ephron. Here for the first time in a fabulous eBook bundle are two of their witty and warm collections. *Best Friends, Occasional Enemies* Lisa and Francesca are best friends-99.9 percent of the time. In other words, they're just like every mother and daughter in the world-best friends and occasional enemies. Here they dish about it all, and whether you're a mother or a daughter you'll find yourself laughing, nodding, and reading this book to those you love. *Meet Me at Emotional Baggage Claim* How does a mother's love translate across state lines and over any semblance of personal boundaries? You'll laugh out loud as Lisa and Francesca face-off over the proper technique for packing dishes, the importance of bringing a coat in the summertime, and the dos and don'ts of dating at any age. Add *Mother Mary* to the mix, and you have a Molotov cocktail of estrogen, opinions, and fun.
